

BIOTECHNOLOGY

Advanced Certificate

Biotechnology significantly impacts our lives and will continue to revolutionize how we diagnose and treat disease, lengthen life spans, feed the planet, and remediate the environment.

The Advanced Certificate is geared for a student who wants to enter into the Biotechnology industry or students who have already completed a Bachelor Degree in a science related field of study. Our nationally recognized Biotechnology program prepares students with the skills and knowledge and our students work in state-of-the-art biotechnology labs with a low student-to-professor and student-to-equipment ratio allowing them to master the skills needed for success.

Current graduates may be found in a variety of biotechnology companies, working as Lab Technicians, Manufacturing Associates, Quality Control and Quality Assurance Technicians, and as Validation Consultants.

Admissions Requirements:

1. Complete application to the program.
2. Provide proof of high school completion or equivalent.
3. Provide evidence of college level Biology and Chemistry.
4. Obtain permission of Department Chair.
